READY TO MOVE OFFICE SPACES

SECTOR-127, NOIDA EXPRESSWAY

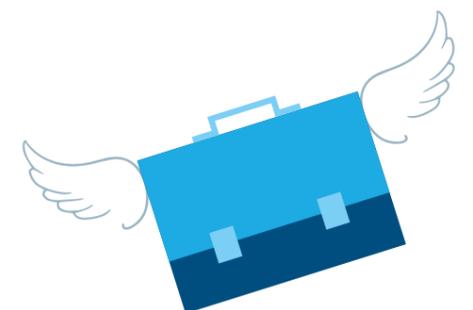

THE WORLD IS GOING BACK TO OFFICE

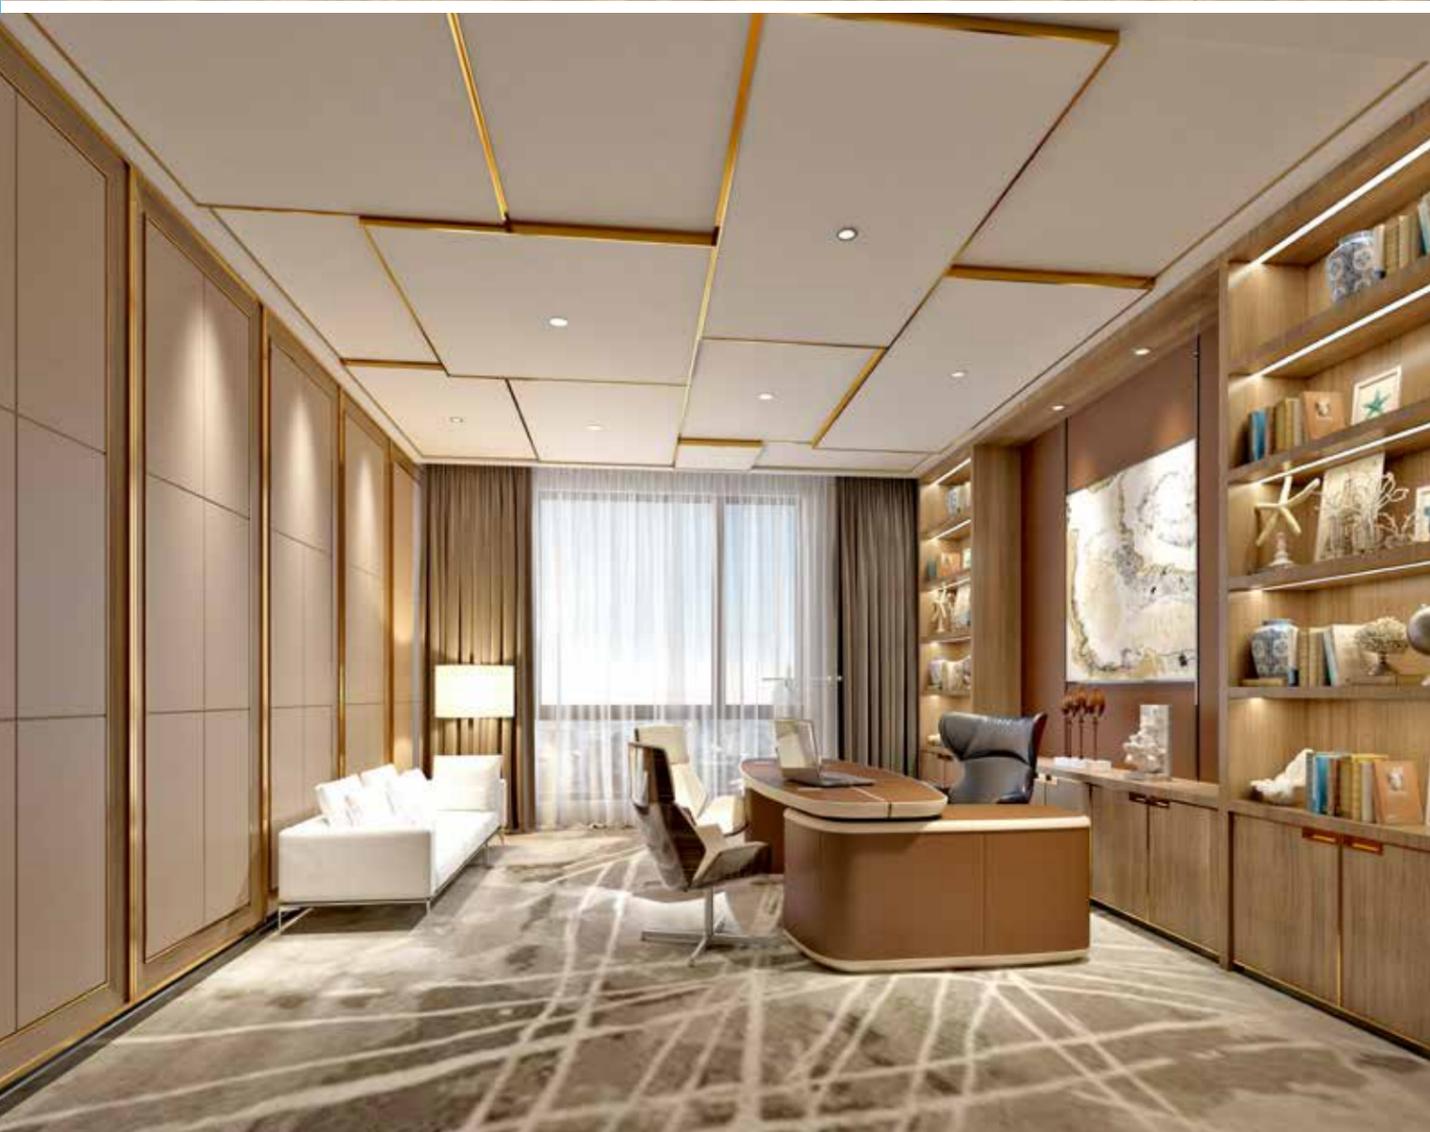

For most of the employees around the world, their work life went through a sudden shift, with offices getting shut and work from home becoming the new norm. After two-long years of managing from home, there is mixed sentiment. While many prefer the flexibility of working from home, they also miss the physical interaction and bonding with colleagues in their workspaces. Also, work from home blurs the boundaries between work and personal spaces, which doesn't make it seem like a viable option in the long term.

Both employers and employees realize that workspaces are about more than just work. A joint survey by tech industry body Nasscom and job listing portal indeed found that employees and employers are equally interested in returning to offices. According to the Nasscom survey, **hybrid work is the preferred choice of over 70% organizations.**

WHY THE RETURN TO OFFICE?

Returning to office helps companies to manage critical business functions better and maintain the organizational culture. Not only that, data security is a big concern in large organizations and it's easier to maintain from an office.

OFFICES ARE BACK IN DEMAND

Flexible workspaces with a 47% share emerged as the key sector to have contributed significantly to large-sized transactions. Supply. The office market of the region has been resilient to global headwinds with emerging sectors like flexible workspaces contributing more than ever in the overall leasing basket.

With corporates taking significant steps towards resuming work from office, increasing vaccination coverage and easing of restrictions, the business sentiment has improved considerably.
